## II- Research Interests:

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Discipline:</b>        | Materials Science and their application                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>Subdiscipline:</b>     | Characterization and development of glass and glass ceramics for a wide variety of applications, indicating present and future research directions in glass and glass ceramics.                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Research Interests</b> | <ul style="list-style-type: none"> <li>✚ Theory, design, device technology, and applications of glass and glass ceramic.</li> <li>✚ Innovative processing and synthesis of glass ceramics and glass;</li> <li>✚ Modeling of ceramics and glasses (from atomic to micro- and macro-scales);</li> <li>✚ Crystallization, glass ceramics and glass;</li> <li>✚ Prospects for advanced glass and ceramics;</li> <li>✚ Optical technology, photonics, and lasers.</li> <li>✚ Sensing and environmental optics.</li> <li>✚ Fiber-optic sensors.</li> <li>✚ Medical application of glass and glass ceramics</li> </ul> |

### Research Projects (Completed)

1. Principal Investigator, Project (G.R. P.127/38)- Preparation of novel glasses based on  $\text{TeO}_2$  doped with rare-earth and their optical applications, (closed).
2. Principle Investigator, Project (RCAMS-KKU-001-17)- Characterization of Novel Material Based on Tellurite Oxide for Nonlinear Application (Closed).
3. Principle Investigator, Project (R. G. P. 2/1/38), Investigation of novel glasses as promising materials for optical application (closed).
4. Principal Investigator, Project (MRMC 01-017-023)- Nano and microstructural of bioactive glasses for bone tissue regeneration (closed)

5. *Principle Investigator Project (MRMC 01-017-024) #(In vitro characterization and structure of nanobiomaterials with inert oxides for biomedical application (closed).*
